Product information, including uses/applications and source(s) of imports:

The subject product, commonly known as Uniconazole-P, is an isomeric mixture that acts as a plant growth regulator and a fungicide. It minimizes plant height by reducing intermodal elongation through inhibition of gibberellin biosynthesis. Uniconazole-P is intended for plants grown in containers such as those in greenhouses, lathhouses, and shadehouses. The proponent imports Uniconazole-P from Sumitomo Chemical Company, Ltd., the parent company of Valent U.S.A. Corp., in Tokyo, Japan. There are no other known importers.

Technical comments:³

³ The Commission may express an opinion on the HTS classification of a product to facilitate consideration of the bill. However, by law, only the U.S. Customs Service is authorized to issue a binding ruling on this matter. The Commission believes that the U.S. Customs Service should be consulted prior to enactment of the bill.

The Commission suggests that the article description on page 1 of this report be used in the proposed new heading in order to provide the correct HTS number, the correct common name and an indicated hydrogen in the chemical name.
